

A Million Words or Less...

Dear Parents/Guardians,

I have an assignment for you, a special request if you will....

Using a **million words or less**, please describe your child! Anything that you feel is important will help me to have more success with your child this year. Children are special and unique in their own way. No one knows this better than you! Please share their likes and dislikes, strengths and weaknesses, fears and courageous acts, hopes and dreams, past successes and failures – anything and everything. Especially include things that worked well in the past with other teachers, and things that did not work so well. Any personal information you are willing to share that would help! It truly does contribute to making a connection and forming a positive relationship with you and your child.

I would appreciate it if you could return this to me by Friday, September 11th.

Thank you in advance for your cooperation,

Ms. Stephanides / Algebra & Geometry Teacher

(please use the back or additional pieces of paper as needed)
