

Name: _____		Date: _____	
Topic: <u>Module 3 : LOGIC</u>		Class: <u>Period: _____</u>	

  

Main Ideas/Questions	Notes/Examples
<b>INDUCTIVE</b> <i>Reasoning</i>	
<b>CONJECTURE</b>	

**Directions:** Find the next five terms of the sequence. Then write a conjecture.

① 38, 31, 24, 17, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_  
 Conjecture: \_\_\_\_\_  
 \_\_\_\_\_

② 2, 5, 11, 23, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_  
 Conjecture: \_\_\_\_\_  
 \_\_\_\_\_

③ 1, 4, 9, 16, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_  
 Conjecture: \_\_\_\_\_  
 \_\_\_\_\_

<b>COUNTEREXAMPLE</b>	
-----------------------	--

**Directions:** Determine whether the conjecture is true or false. If false, provide a counterexample.

④ Squaring a number and adding one will always result in an even number.

⑤ Vertical angles are never complementary angles.

⑥ The product of two numbers is always larger than either number.

⑦ If  $LM = MP$ , then  $M$  must be the midpoint of  $\overline{LP}$ .

Main Ideas/Questions	Notes/Examples
<b>STATEMENT</b>	<ul style="list-style-type: none"> <li>A statement is a sentence that is either _____ or _____.</li> <li>This is called the _____.</li> <li>Represented using letters such as _____ or _____.</li> </ul>
	<div> <b>EXAMPLE:</b>  <math>p</math>: Supplementary angles have a sum of <math>180^\circ</math>. </div> <div> <b>Truth Value:</b> </div>
<b>NEGATION</b>	<ul style="list-style-type: none"> <li>A negation of a statement has the _____ truth value.</li> <li>Shown by the symbol _____. <span>Read as "not <math>p</math>"</span></li> </ul>
	<div> <b>EXAMPLE:</b>  <math>\sim p</math>: Supplementary angles do not have a sum of <math>180^\circ</math>. </div> <div> <b>Truth Value:</b> </div>
<b>COMPOUND</b> <i>Statements</i>	
<b>CONJUNCTION</b>	<ul style="list-style-type: none"> <li>Statements joined by the word _____.</li> <li>Written as <math>p \text{ } \_\_\_\_\_\_ q</math>.</li> <li>True when _____ statements are _____.</li> </ul>
<b>DISJUNCTION</b>	<ul style="list-style-type: none"> <li>Statements joined by the word _____.</li> <li>Written as <math>p \text{ } \_\_\_\_\_\_ q</math>.</li> <li>True when _____ statement is _____.</li> </ul>

<b>CONDITIONAL</b> <i>Statements</i>	<ul style="list-style-type: none"> <li>A statement that can be written in _____ - _____ form.</li> </ul> <div> <b>Symbolic Form:</b> _____ <span>Read as "if <math>p</math>, then <math>q</math>" or, "<math>p</math> _____ <math>q</math>".</span> </div> <ul style="list-style-type: none"> <li>The _____ is the phrase that immediately follows _____.</li> <li>The _____ is the phrase that immediately follows _____.</li> </ul>
<b>EXAMPLES</b>	<b>Identify the hypothesis and conclusion of the following conditional statements:</b>
	1. If you live in Nashville, then you live in Tennessee. <b>Hypothesis:</b> _____ <b>Conclusion:</b> _____
	2. If the sum of the measures of two angles is $90^\circ$ , then they are complementary angles. <b>Hypothesis:</b> _____ <b>Conclusion:</b> _____
	3. If a quadrilateral is a square, then it has four right angles. <b>Hypothesis:</b> _____ <b>Conclusion:</b> _____

RELATED CONDITIONAL	DEFINITION	SYMBOLIC FORM
<b>INVERSE</b>	Formed by _____ the hypothesis and conclusion.	
<b>CONVERSE</b>	Formed by _____ the hypothesis and conclusion.	
<b>CONTRAPOSITIVE</b>	Formed by _____ and _____ the hypothesis and conclusion.	

**Directions:** Write the inverse, converse, and contrapositive of the following conditional statements. Determine the truth value. If false, provide a counterexample.

1. If it is Saturday, then there is no school.

• **Inverse:** \_\_\_\_\_

**Truth Value:** \_\_\_\_\_

• **Converse:** \_\_\_\_\_

**Truth Value:** \_\_\_\_\_

• **Contrapositive:** \_\_\_\_\_

**Truth Value:** \_\_\_\_\_

Main Ideas/Questions	Notes/Examples
<b>BICONDITIONAL</b> <i>Statements</i>	<ul style="list-style-type: none"> <li><b>Definition:</b> _____</li> <li><b>Symbolic Form:</b> <math>(p \rightarrow q) \wedge (q \rightarrow p)</math>: _____</li> <li><b>Read as</b> " _____ "</li> <li><b>Truth Value:</b> Biconditional statements are true when _____ and _____ are _____!</li> </ul>

**Directions:** Given the biconditional statement below, write both the conditional and converse. Determine the truth value of the biconditional. Explain why it is true or false.

1. Two angles are supplementary if and only if the sum of their measures is  $180^\circ$ .

**Conditional:** \_\_\_\_\_

\_\_\_\_\_

**Converse:** \_\_\_\_\_

\_\_\_\_\_

**Truth Value?** \_\_\_\_\_

Main Ideas/Questions	Notes/Examples
<b>DEDUCTIVE</b> <i>Reasoning</i>	
<b>LAW OF DETACHMENT</b>	<p>Given a conditional statement, if the _____ is _____, then the _____ is _____.</p> <p style="text-align: center;"><b>LAW OF DETACHMENT</b></p> <p>Symbolic Map: <math display="block">\begin{array}{l} p \rightarrow q \\ p \\ \hline \therefore q \end{array}</math></p>
<b>Directions:</b> Use the Law of Detachment to give a valid conclusion. If not possible, write <i>no valid conclusion</i> .	

**Given:** If a quadrilateral is a rhombus, then it is also a parallelogram.  
 Quadrilateral ABCD is a rhombus.

**Conclusion:** \_\_\_\_\_

**Given:** If the sum of the measures of two angles is  $90^\circ$ , then they are complementary.  
 $m\angle J = 58^\circ$  and  $m\angle K = 32^\circ$

**Conclusion:** \_\_\_\_\_

<b>LAW OF SYLLOGISM</b>	<p>Allows you to draw a conclusion from _____ conditional statements in which the _____ of the first statement is the _____ of the second statement.</p> <p style="text-align: center;"><b>LAW OF SYLLOGISM</b></p> <p>Symbolic Map: <math display="block">\begin{array}{l} p \rightarrow q \\ q \rightarrow r \\ \hline \therefore p \rightarrow r \end{array}</math></p>
<b>Directions:</b> Use the Law of Syllogism to give a valid conclusion. If not possible, write <i>no valid conclusion</i> .	

**Given:** If a quadrilateral is a square, then it is a rectangle.  
 If a quadrilateral is a rectangle, then it has four right angles.

**Conclusion:** \_\_\_\_\_

**Given:** If a number is divisible by 12, then it is divisible by 6.  
 If a number is divisible by 6, then it is divisible by 3.

**Conclusion:** \_\_\_\_\_
